Solutions for a smaller carbon footprint and a climate positive world.

Together with our customers we write our own success stories on climate protection – for the economy, society and above all the world.
Together with committed companies and private individuals, we implement climate protection solutions at the national and international levels.

Together with our customers, we support and promote effective climate protection projects for a more habitable planet and better living conditions for every one of us.

**WITH HEART, COMMITMENT AND PASSION...**

carbon-connect AG is your partner for environmental and climate protection.
In our detailed blog and our Infothek, we regularly provide information on such subjects as environmental and climate protection, CO2, climate conferences and neutrality.

We inform and sensitise, because we want everyone to make his or her personal contribution to a better collective future.

**CO₂-FOOTPRINT**
Measure and calculate as well as identify climate risks

- CO₂ balance sheets
- Ecological balance sheet
- Sustainability reporting

**Corporations**
- Corporate Carbon Footprint

**Products**
- Product Carbon Footprint
Together with our customers, we support and promote effective climate protection projects for a more habitable and sustainable planet and better living conditions for us all.

Calculate and measure your CO₂ footprint
In a first step, we measure and calculate your greenhouse gas emissions (Corporate Carbon Footprint) or the ecological footprint of your product (Product Carbon Footprint). This first step includes: the system boundaries, methodology incl. report, data basis incl. potential climate risks as well as a breakdown according to Scope 1, Scope 2 and Scope 3 CO₂-eq.

Plan a sustainability strategy and define objectives and goals
Together we develop and plan your individual sustainability strategy and endeavour to reduce your CO₂ footprint. To reach the 1.5 degree target, human-induced CO₂ emissions must decrease significantly before 2030 and reach net zero emissions by around 2050.

Investments in climate protection measures
Your inevitable CO₂ emissions are offset by a climate protection project, and your company or product is positioned as climate neutral. You invest in climate protection measures.

Communication
Communicate your commitment and inspire your stakeholders. Communication should always be done both internally and externally.
**FOREST CONSERVATION**

RMDLT Portel-Pará REDD
Brazil, Pará State, Portel

- Deforestation protection
- Avoids ca. 10,000,000 tons of CO₂ within 40 years
- An area of about 130,000 hectares
- Education and/or training of the local population
- Creating jobs

**AFFORESTATION**

„Guanaré“ forest plantations
Uruguay, Cerro Largo

- Afforestation and management of forests (former pasture land for cattle breeding)
- Saves approx. 7,645,000 tons of CO₂ within 60 years
- Approx. area 20,800 hectares
- Training of agroforestry technicians
- Promotion of jobs

**WIND POWER**

InfraVest Guanyin Wind Farm
Taiwan, Guanyin

- Counter trend to fossil fuel, imported power mix of gas and coal
- Produces clean and renewable electricity for about 30,000 households
- Saves about 100,000 tons of CO₂ each year
- Creation of jobs
- Technology and knowledge transfer

**COOK STOVES**

Efficient cook stoves in Africa
Kenia, Aberdares

- Efficient cook stoves for homes (wood fired)
- Saves about 20,000 tons of CO₂ each year
- Less carbon monoxide and particulate matter
- Air pollution risk factor decreases
THE 1 MILLION TREES CHALLENGE

Become a Treellionaire

We went live on our new platform www.treellionaire.com in November 2019.

Our goal: Plant one million trees! Scan the QR Code and help:

ABOUT US

carbon-connect AG is a provider of voluntary CO₂ compensation measures. With our climate labels, we show committed entrepreneurs how to make a process, a product or an entire company climate neutral. We show our clients the most sensible and profitable ways to integrate environmental protection measures as well as the sustainable management of their business processes. Let us begin something today that we can be proud of tomorrow. We are your partner for effective climate protection, CO2 balancing and CO2 offsetting.
